

EDGARDO ALEJANDRO GALDÁMEZ VELÁSQUEZ

UNITY DEVELOPER | UI & GAMEPLAY SYSTEMS

San Salvador, El Salvador | +503 7900-5616 | gardo93g@gmail.com
gardo93g.github.io | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Unity developer with 5+ years in mobile game development and 7+ years in software, building polished, responsive, and maintainable player-facing systems in Unity and C#. Most recently Unity Engineer on **Domino Delights** (iOS/Android), a live free-to-play puzzle game with 4,000+ levels in 16 languages. Specialized in uGUI, UI Toolkit, animated screen flows, state-driven UI architecture, and the integration of UI with gameplay, progression, LiveOps, analytics, and backend data. Experienced in turning Figma designs into production-ready interfaces, profiling for low-end devices, and debugging live issues with distributed remote teams.

CORE SKILLS

UI Programming: Unity uGUI, UI Toolkit, HUDs, menus, pop-ups, navigation flows, responsive layouts, reusable components

Programming & Architecture: C#, event-driven architecture, state machines, modular systems, REST/JSON services

Animation & Content: DOTween, Animator, Addressables, VFX-driven reward flows, sprite atlases, Figma-to-Unity

Performance & Quality: Unity Profiler, memory and rendering optimization, batching, draw-call reduction, Crashlytics

Tools & Collaboration: Git, Firebase, Firestore, analytics integration, technical documentation, remote collaboration

PROFESSIONAL EXPERIENCE

Harmony Games | Unity Engineer

Apr 2023 - Oct 2025

Remote - United States

All-remote, seed-funded mobile studio. Shipped **Domino Delights** ([App Store](#) · [Google Play](#)), a free-to-play puzzle game with 4,000+ levels in 16 languages.

- Implemented and maintained player-facing interfaces in Unity and C#: gameplay HUD, menus, pop-ups, progression screens, event interfaces, and animated reward presentations.
- Built event-driven UI sequences with DOTween and Addressables, using gameplay-state validation, gating, and queue management to prevent overlapping pop-ups, animations, and reward flows.
- Built the Domino Adventures minigame end to end, from first prototype to production: rules, board state, UI, and reward payouts.
- Connected UI to gameplay, progression, daily rewards, seasonal content, Firebase, Firestore, REST APIs, and analytics pipelines for the live title.
- Established the team's Figma-to-Unity workflow, documented implementation standards, and supported other developers in shipping consistent, maintainable UI features.
- Investigated Crashlytics reports and runtime failures, isolated production defects, and delivered targeted fixes without regressions in dependent gameplay and UI systems.

Kubiak LLC | Mobile Game Developer

Dec 2020 - Feb 2023

Remote - United States

- Developed Unity UI systems, gameplay flows, state machines, and screen-transition frameworks using C#, uGUI, UI Toolkit, and Animator.
- Created reusable interface and gameplay architecture shared across multiple mobile prototypes and genres, shortening iteration on each new project.
- Delivered three playable mobile prototypes in six weeks, turning product requirements into working gameplay loops, menus, interaction states, and feedback systems.
- Removed frame-time spikes on low-end devices through profiling, sprite atlases, batching, rendering optimization, and memory-efficient asset workflows.

TreeCloud Technologies | Game Developer Intern

Oct 2019 - Jan 2020

San Salvador, El Salvador

- Developed interactive gameplay prototypes in Unreal Engine 4, including Kinect motion-controlled games, for technical validation and client demonstrations.
- Implemented drone behavior and LiDAR point-cloud visualization with a multidisciplinary team.

OFBOX | Junior Software Developer

Oct 2017 - Oct 2019

San Salvador, El Salvador

- Optimized legacy C#/.NET software, resolved defects, and improved performance and stability in production environments.
- Developed data-extraction and internal integration tools supporting business workflows and system interoperability.

EDUCATION & LANGUAGES

Computer Science Degree | Universidad Centroamericana José Simeón Cañas (UCA), El Salvador

Languages: Spanish (native), English (professional working proficiency)
